- Hours and days of service;
- Restrictions or priorities based on trip purpose;
- Availability of information and reservations capability;
- Any constraints on capacity or availability;

-General Service Requirements

Control of the service animal is the responsibility of the animal's partner. Any animal out of control will not be transported. If an animal's behavior creates a hazard or direct threat, the accountability for damages or injuries shall remain with the person responsible for the animal.

Service animals should sit or lie on the floor. Animals should not occupy a passenger seat, and should not block the passenger aisle.

c. Transporting of Wheelchairs

Three or more wheeled devices, usable indoors, designed or modified for and used by individuals with mobility impairments, whether operated manually or powered, will be accommodated as long as the lift can accommodate the size and weight of the wheelchair and its user and there is space for the wheelchair on the vehicle. Mobility devices will not be transported if they are inconsistent with legitimate safety requirements.

Section 38.23(d) of the DOT's ADA regulation requires all ADA compliant vehicles to have a two-part securement system: One to secure the mobility device and secondly a seatbelt and shoulder harness for the wheelchair user, complying with all applicable provision of Title 49 Part 571, (such seat belts and should harnesses shall not be used in lieu of a device which secures the wheelchair or mobility aid itself).

The Securement system shall limit the movement of an occupied wheelchair or mobility aid to no more than 2 inches in any direction under normal vehicle operation conditions. 49 CFR Part 38(d) (5)

All wheelchairs must be secured to the floor of the vehicle using the securement equipment.

Standees should stand in the center of the platform facing the direction of travel. If capable, the passenger should hold both handrails when on the platform.

It is recommended that power chairs and scooters be turned to the "OFF" position once on the lift platform and while the lift is in operation.
